

[AccessHemOnc](#) (HEMONC) is an online medical resource that provides a complete spectrum of authoritative, trusted, and current information covering the breadth of hematology and oncology. This site provides coverage of core topics that are essential for any medicine or specialty curriculum and also especially helpful for board review. The [Williams Manual of Hematology, 9e](#), has been widely used for board preparation. AccessHemOnc offers content that program and fellowship directors find critical to learning about hematology-oncology, covering every malignant and non-malignant topic in the field. The site includes the leading current comprehensive texts such as [Williams Hematology, 9e](#), [The MD Anderson Manual of Medical Oncology, 3e](#), [The Basic Science of Oncology, 5e](#), and the very popular [Hematology-Oncology Therapy, 2e](#), featuring content with more than 500 cancer treatment regimens updated online ahead of print. Contained within *Hematology-Oncology Therapy, 2e*, you will find invaluable information regarding how to administer treatment regimens, implement suggested modifications, and provide supportive care. Additionally, this resource provides information on toxicity, monitoring, and efficacy of commonly used and recently approved chemotherapeutic regimens, drugs, and biological agents. The site will enhance and strongly support hematology-oncology fellowships with content that is written and presented to you from trustworthy sources in hematology and oncology research.
