Leadership Programme

Welcome Event

A welcome to the Laidlaw Scholarship by the Deputy Vice Chancellor to new scholars and their supervisors. Current and alumni scholars will give presentations on their scholarship experience, research projects, achievements and future plans. This is an opportunity to network with scholars and staff.

Induction, Leadership and Skills Development Residential

An introduction of new scholars to leadership, research methods, presentations skills and examples of excellent projects. Scholars will undertake skills development sessions cover a range of topics including personality profiles, networking, project management, communication skills and presentation skills. Scholars have an opportunity to network with current scholars from previous years.

Leadership and Teambuilding Development Residential

A two-and-a-half-day residential focusing on development reflection, leadership and team-building at the University's outdoor centre at Selside (with groups participating on different dates). Scholars put leadership in practice in a range of activities led by an outdoor leadership professional.

Reflection, Leadership and Skills Development Day

A one-day session focusing on the importance of leadership and management to individual and organisational success. This session helps scholars to develop an awareness of personal strengths and abilities in order to build future leadership capabilities.

Education Outreach Day

A one-day session combines leadership capabilities with the ability to distil complex information to a non-specialist audience. Scholars spend a full day in a primary school in Leeds to raise aspirations and attainment through supporting children to think about the range of future work opportunities, excite them about how subject areas translate into the real-world and to encourage them to be ambitious about their futures.

Cultural Development Residential

A two day residential with a focus on developing social and cultural capital through experiencing world class performance and art. This element of the programme is designed to bring the scholars together over the course of a weekend to experience regional cultural attractions and events.
