

Network audio solutions for security, safety, and operations.

Axis network audio solutions provide public address announcements and instructions as well as background music. Did you know they also add value to your video-based security system by helping you act on what you see? With prerecorded or live voice messages, you can respond and intervene to stop unwanted activities. Add analytics to cameras to detect and trigger announcements and alerts over network speakers.

Use case applications with speakers, cameras, and analytics

<p>Mass communications</p>  <p>Deliver emergency or mass communication messages.</p> <ul style="list-style-type: none"> > Through our partner integrations, deliver messages through Axis network audio devices in multiple zones, as well as to various outputs such as email, SMS, digital display, etc. 	<p>Perimeter protection</p>  <p>Detect unusual activity in a defined perimeter of the camera and deliver a voice message.</p> <ul style="list-style-type: none"> > Automatic detection with on-camera video analytics, customized live or pre-recorded messages and two warning zones with perimeter crossings. Alerts can be sent by email or on screen. 	<p>Announcements and automatic messages</p>  <p>Broadcast live, scheduled, or triggered messages at the right time and place.</p> <ul style="list-style-type: none"> > Deliver instructions, marketing promotions, daily in-store or in-school announcements. Communicate with one person or an audience in one or multiple zones. Integrate with video, access control, VoIP and more to help keep people informed and improve operational efficiency. 	<p>Shoplifting</p>  <p>Reduce shoplifting and deter criminals in specific areas.</p> <ul style="list-style-type: none"> > Emit pre-recorded welcome messages upon detection of shopper, as a deterrent, to let them know they are being 'watched.' Notifications can be sent to staff via email or to an extension or radio.
<p>Unauthorized access</p>  <p>Detect and act on non-authorized access or tailgating in areas with access control.</p> <ul style="list-style-type: none"> > On-camera video analytics provide second validation. Send customized on-site messages when tailgating is detected and automatic notifications to security staff. 	<p>Blocked exit</p>  <p>Detect objects left in areas or emergency exits; items such as carts, bikes, boxes, wheelchairs, and other obstructions.</p> <ul style="list-style-type: none"> > Increase safety and enforce compliance. Automatic detection with on-camera video analytics with live or pre-recorded audio messages. 	<p>Parking violation</p>  <p>Detect potential parking violations and identify events as soon as possible.</p> <ul style="list-style-type: none"> > Trigger live or pre-recorded audio messages upon detection of violations with video analytics. Automatic notifications sent via VMS or email. 	<p>Background music</p>  <p>Create ambiance wherever and whenever you need it and customize your set up easily.</p> <ul style="list-style-type: none"> > Together with our music-provider partners, we offer a complete solution for playing background music in a business setting. Our all-in-one, network audio speaker systems include all the hardware and software you need to ensure your music is played at the right time, zone, and volume.

Product image	Part number	Product name	Audio product type	Typical installation
	02813-001	AXIS C1310-E Mk II Network Horn Speaker	Re-entrant horn for clear long-range speech.	Outside or inside in noisy areas. Mount on buildings, poles, structures or walls.
	02380-001	AXIS C1610-VE Network Sound Projector	IP66 & IK10 rated vandal-resistant speaker with a sleek, aesthetic design and natural, rich sound.	For inside or outside installation on buildings, walls, ceilings. Easy, click-in mounting bracket.
