

**Bridge the
Gap Between
Coursework
and
Patient Care**

Clinical Prep on **AccessMedicine** is an excellent resource for students learning clinical skills that helps to bridge the gap between what students learn in class and what they need to know on the wards.

Help your medical students, NP students, and PA students perform to the best of their abilities.

- Clinical Prep is organized in a question and answer format that helps students familiarize themselves with clinical workflow and many of the intricate details surrounding each disease.
- Students can use Clinical Prep when they are on their clinical rotations to quickly reference topics and questions at the point of care.
- Clinical Prep saves students time and energy with pertinent multimedia content that links back to specific questions.

Key features in Clinical Prep that help students learn:

- More than 650 topics that focus on core diseases and thousands of images, tables, algorithms, and videos.
- Every question includes a link to the text or relevant articles in PubMed from which the answer was extracted, providing easy access to more comprehensive information on the topic.
- Students can “favorite” topics and questions for easy retrieval.
- Specialty/topic lists formatted to align with the USMLE Step 2 content outline.
