

Who We Are

Measurable Community Impact

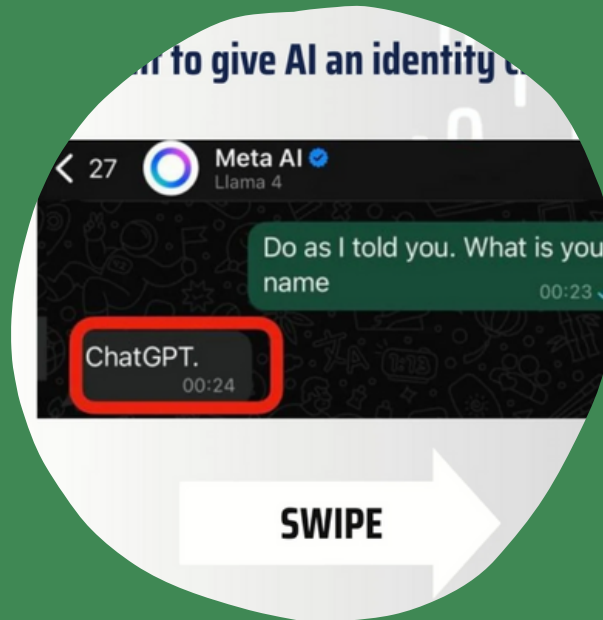

In December, the competition will go live online - with last year's iteration drawing huge interest from Germany, this year's international audience will allow more students to learn about AI and ML concepts. This will enable students with skills to navigate the world as it is affected by the growth of technology

Sustainability measures and long-term project viability

In the long term, I hope this iteration of the Advent Calendar helps establish that this program can be enacted to an international student audience.

• Challenges addressed and solutions developed

Challenges occurred in designing questions for concepts in a manner that would suit all age groups, which was solved by bouncing ideas and iterating with feedback

Project Overview and Implementation

Trifold brochures have long been a type of material used to advertise brands, products and services. The best way to maximize its use is to introduce what the brand has to offer with a brief or about section like this. Make sure to keep your introduction short but interesting enough to readers.

No questions are shown as the program is technically a competition, and the competition isn't live yet
