

Human Biological Specimens

Healthy and disease state tissues,
cells, blood and biofluids.

The sample lies at the heart of everything we do

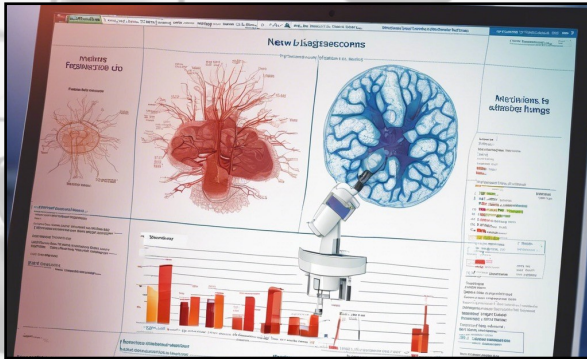

Our products and services enable scientists to

- Discover new drug targets
- Identify and validate novel biomarkers
- Understand normal and disease states
- Develop diagnostic tests

Specimens and Services

Collection Types

- Prospective, Retrospective and Cadaveric
- Customer Approved Standard Operating Procedures
- Longitudinal Studies
- Resections and Biopsies
- Matched Patient Samples

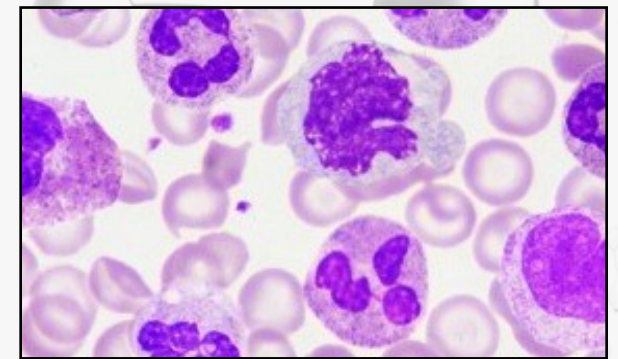

Focussing on precision and reliability, our flexible and customised specimen collection methods ensure that we meet the unique needs of every research project.

Specimen Formats

- Biofluids
- Tissue Samples
- Whole Blood
- Blood Products
- Cells and Cell Lines
- Genomic Materials
- Exosomes
- and More*

Dedicated to providing a fully customizable platform for sourcing human tissues and specimens for research, designed to fuel groundbreaking discoveries.

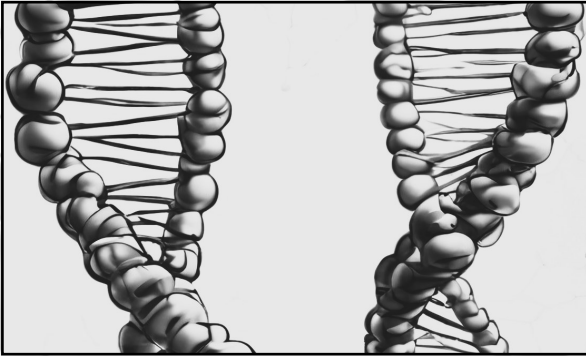

Disease Indications

- Oncology
- Infectious Diseases
- Neurology
- Immunology
- Gastrointestinal
- Metabolic Disorders
- Rare Diseases
- and More*

Specimens are meticulously sourced and preserved to provide invaluable insights into disease mechanisms, therapeutic targets, and diagnostic markers.

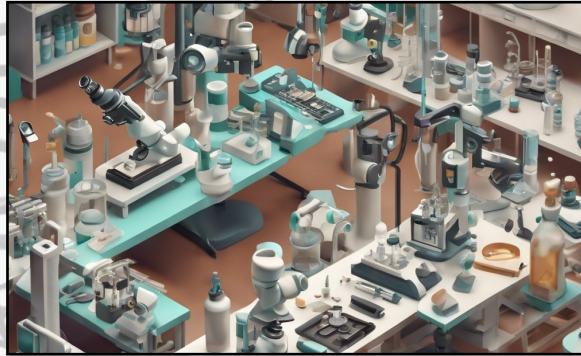

Specimens and Services

Ethics Policy

- Informed Patient Consent
- Confidentiality and Data Protection
- Ethical Collection and Compliance Practices
- Responsible Distribution
- Usage Monitoring

Unwavering commitment to ethical conduct, upholding the highest standards throughout our operations, from donor consent and privacy to specimen collection and distribution.

Screening Services

- Microbiology Testing
- Full Blood Analysis
- Expert Pathology Review
- Immunohistochemistry
- *In Situ* Hybridization
- Flow Cytometry
- PCR and NGS
- *and More*

Experience exceptional precision, unwavering reliability, and complete flexibility as our human biomarker research services are fully customisable to align perfectly with your research.

Specialised Logistics

- GDP-Compliant and ISO 9001 Accredited Logistics
- Global Coverage
- 24/7 Monitoring
- Risk Management
- Regulatory Compliance
- Temperature-Control Solutions

Collaborating with key regulatory bodies, to ensure safety and compliance. Trust us to handle your precious biological shipments with the respect and diligence they deserve.

Compare Your Biomarket

Compare[®]
Biomarket

Every researcher has a unique Biomarket, your preferred selection of human tissue and specimen providers, but how do you compare your tissues and specimens on a like-for-like basis, and how do you know if you're getting good value?

By comparing Your Biomarket, accessing the highest quality human tissues and specimens, and maximizing the value of your research budget!

Our platform offers transparent comparisons and pricing, ensuring you make the most informed decisions with quality, value, ethical sourcing, and compliance at the forefront. **#CompareYourBiomarket**
