

# Mimo Launches the Adapt Line of Commercial Android Tablets at InfoComm 2025

**Libertyville, IL — June 3, 2025** — Mimo, the leader in small-format commercial displays and AV solutions, is proud to unveil its next-generation Android-based line of tablets: The Adapt LTS. This rugged, enterprise-ready platform is available in a range of sizes and engineered to meet the rigorous demands of retail, corporate, healthcare, and industrial environments. The full product line will be showcased at InfoComm 2025 in Orlando June 11-13 in Booth #3061.

Unlike consumer tablets retrofitted for commercial use, the Adapt family of tablets is built from the ground up to power 24/7 fixed installations such as digital signage, room scheduling, kiosk interfaces, and industrial control panels.

## Built for Purpose. Engineered for Longevity.

Mimo's Adapt line offers:

- **Long-term product availability and consistency** - no forced refreshes every year
- **Competitive pricing and TAA compliance**, thanks to Taiwan-based manufacturing
- **No battery hazards**, making it ideal for healthcare and commercial environments
- Support for **advanced I/O**, including GPIO, RS-232, SD card slots, and USB Pogo pins

Each Adapt tablet features:

- **Durable commercial housing** with **tempered glass**
- **Android 12 OS** powered by **ARM Cortex-A55 / RK-3568 processor**
- Optional **PoE / PoE++** for simplified deployment
- Wired and wireless Ethernet
- No internal battery (ideal for always-on installations)
- VESA mounting compatibility for wall, kiosk, and in-wall integration
- Models ranging from **7" to 32"** with full HD resolution (13.3", 15.6", 21.5" models)

"Adapt LTS is the smarter successor to our popular line of tablets now with a faster processor and Android 12," says David Anderson, Founder and CEO of Mimo. "Because the form factor looks identical to its predecessor, drop-in replacement is easy and backward compatibility is ensured to simplify customer upgrades without requiring infrastructure changes."

## Real-World Ready

Built for end-caps, kiosks, hospital rooms, shop floors, and meeting rooms, Adapt tablets have already found early deployment success in sectors such as higher education and retail. Its rugged design and reliable performance make it a go-to for integrators seeking a turnkey Android platform without compromise.

Adapt-LTS is available for order via authorized distribution channels and on [www.mimomonitors.com](http://www.mimomonitors.com). See it in action at InfoComm 2025 by stopping by **Booth #3061** or scheduling time with a Mimo rep via <https://mimomonitors.zohobookings.com/#/MimoSales>.
