

## Mimo Launches First EDLA-Certified Commercial Android Tablet

*The Mimo Adapt EDLA was built for business and backed by Google*

Libertyville, IL — September 3, 2025 — Mimo, the leader in small displays, tablets and AV technology, is proud to announce the launch of its newest innovation: the Adapt EDLA. This rugged commercial-grade tablet has firmware built to pass Google’s rigorous EDLA (Enterprise Devices Licensing Agreement) certification standards.

EDLA is Google’s new standard for commercial and enterprise Android devices. Devices must: run Google Mobile Services (GMS); support Android Enterprise features; and receive timely security and system updates. This landmark release marks Mimo’s first device to include GMS bringing the power of the Google Play Store, core Google apps (e.g. Drive, Chrome, etc.), and enterprise-grade security to a commercial tablet purpose-built for demanding environments.

“The MCT-101EDL represents years of technical development and collaboration,” said Tom Doddridge, Product Manager at Mimo. “We’ve worked tirelessly to achieve full EDLA certification, ensuring that our customers get the reliability and flexibility they’ve been asking for, without compromise.”

The EDLA-certified tablet is powered by Android 14, with guaranteed security patches, seamless compatibility with mobile device management (MDM) tools, and out-of-the-box support for Android Enterprise. These capabilities are critical for organizations needing controlled app environments, secure deployment, and real-time updates across a device fleet.

Unlike consumer-grade Android tablets, the Mimo Adapt EDLA is tailored to commercial deployment:

- Durable and rugged construction
- No bloatware or third-party launchers
- Native Google Play access
- Configurable via enterprise-grade tools

Whether in retail, logistics, education, or corporate environments, this tablet delivers a robust Android experience while giving IT teams the control and assurance they demand.

The Mimo Adapt EDLA (part number MCT-101EDL-POE) is available now and shipping through Mimo’s distribution network. It will also be featured at upcoming partner events including

BlueStar and Almo E4, with broader education market outreach planned for EDUCAUSE in late October. For more information, visit [www.mimomonitors.com](http://www.mimomonitors.com) or contact [sales@mimomonitors.com](mailto:sales@mimomonitors.com).

**About Mimo**

Mimo believes small screens can achieve big things. Since 2008, the company has prioritized product innovation and leveraged its digital display expertise to deliver premium quality A/V solutions. With a customer-first approach, Mimo ensures peak performance in any setting from digital signage, conference rooms, college campuses, classrooms, kiosks, point of purchase, point of sale, hospitality, retail, and more. Mimo has garnered the trust of global Fortune 500 companies including Google, Lenovo, Asus, Netflix, Bose, Honeywell, Hershey's Grainger, John Deere, and many more around the world.
