

I am downloading MARC records. What is the difference between the “full set” and the “archived full set”?

The MARC record files provided for the corresponding McGraw-Hill Medical site with the "Regular full set" term in the naming convention reflect all of the titles on the site which are visibly accessible on the site.

The MARC record files provided for the corresponding McGraw-Hill Medical site with the “Archived full set” term in the naming convention reflect all of the titles on the site which are previous editions of the most current editions.
